## Competition Compliance Training for the Financial Services Sector

Our practical and highly participative workshops have been developed specifically for legal and non-legal staff to enable you to plan and protect your business from day-to-day competition and compliance issues.

All our training seminars are interactive sessions where we like to use a combination of slide presentations, case studies, group exercises and discussion. The key to successful training and, in turn, competition law compliance, is to ensure that complex concepts are explained clearly and that commercial personnel are provided with tailored guidance.

The list below sets out our range of standard compliance training topics. However, we can provide bespoke training to clients on issues pertinent to their organisation. We also have experience of developing training programmes for clients to be used across their organisation – we teach the teachers. We are happy to discuss your training requirements with you in order to meet your needs.

- Competition law issues in the financial services sector
- Competition law – the basics
- Ensuring commercial arrangements are competition law compliant
- Managing market success – how to avoid breaching competition law if you have a dominant market position
- Market definition, market share and market power – what do these mean for the financial services sector?
- Directors and competition law – what are directors expected to know?
- Contacts with competitors and trade associations
- Achieving competition law compliance within your organisation
- An inspector calls – dawn raid training

If you are interested in any of the training topics listed or would like us to develop bespoke training, please contact us.
